Just Like New Shower Restorer & Hard Surface Cleaner Kit

MECHANICAL APPLICATION

You can also mechanically apply a "Just Like New" Cleaner by attaching a non-abrasive application pad to a random orbital sander, slow to moderate speed buffer/polisher, or power tool attachment suitable for a paste-type application. Trim the application pad to fit the device and impregnate it with the paste. When using this product with a power tool, always use an RCD/safety switch or another isolating plug suitable for protecting against accidental electrical shock.

We recommend that you do not use the mechanical application method on vehicle windscreens and windows or building windows. These types of glass can be softer and susceptible to marking in some circumstances.

KIT CONTENTS: 500g cleaner paste in a container and 3 non-abrasive application pads

- "Just Like New" Cleaner will remove water spots and other stains from:
 1. Glass showers
 2. Glass windows on vehicles, buildings, boats and equipment
 3. Glass & stainless steel balustrades
 4. Stainless steel sinks, shower trays, laundry tubs, rails & fittings
 5. Ceramic, porcelain or vitreous china tiles, sinks & bathroom fittings
 6. Chrome tapware
 7. Ceramic & stainless cooktops
 8. Glass oven doors • Glass & wood fireplace glass
 9. Aquarium & terrarium glass
 10. Other hard surfaces
- "Just Like New" Cleaner is not designed for use with painted surfaces, acrylics, plastics, prescription glass, Perspex, the exterior of stainless steel or chrome appliances and other semi-soft materials.

DIRECTIONS FOR USE

1. Impregnate a non-abrasive application pad with a "Just Like New" Cleaner. A pad should hold about three tablespoons of paste when fully impregnated.
2. Ensure the clean surface is dry and free of dust or gritty grime.
3. Place two fingers on the back of the impregnated application pad. Using a back-and-forth motion, firmly rub an area about 10cm long. Continue this action, working away from the cleaned area.
4. Add more paste to the application pad as required.

To finish, you can either: rinse the cleaned surface with fresh water & a cloth or sponge, remove excess water and dry; or remove any paste residue and polish with a clean, dry cloth.
