

## UPRIGHT BELT SANDER

Locally manufactured in Australia, the solid construction, quality components and industrial protective paint finish will see this machine running trouble free for decades.

Simple belt tracking and tension release lock makes for fast change over of the 2690mm belts.

Designed and built locally to cope with the harsh environment of glass processing, this machine design has been tried and proven over many years. All parts are off the shelf and readily available if ever required.

- 1hp single phase electric motor.
- Emergency stop button.
- Limit switch to side door.
- Anti-Pinch plate in front of contact wheel for added safety.
- Water flow control spray nozzle.
- Sump drain with threaded female port.
- Mounting bracket for water recirculation pump.
- Steelwork sandblasted, primed and wet sprayed with industrial hammer finish, to create a durable, long life finish.
- Heavy Duty fully welded 3mm steel plate construction.
