- This unique product, designed and manufactured in Italy
- A miniaturised hydraulic door closer, concealed within a corner patch fitting 56mm high x167mm long
- Capable of supporting 100kg of glass doors from 8mm to 13.53mm thick
- Adjustable closing and latching speeds
- Stops at 0°, +90° and -90°
- The closing automatism kicks in within the 70°-80° range. The closing is soft for the first 20° and becomes speed-adjustable from 60° up to complete closing.
- Suitable for indoor/outdoor applications

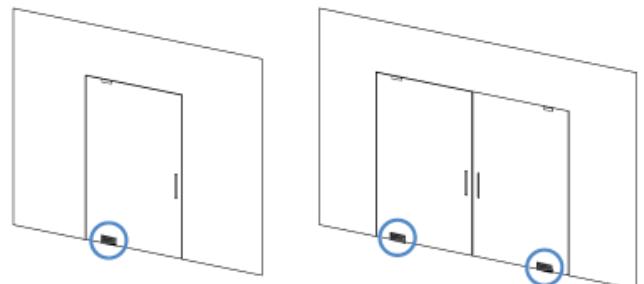

A SINGLE hinge can be used to support heavy doors without having to change the closing mechanism, which remains automatic. The pivot variant can be mounted on very large doors, providing excellent stability, safety and minimum space.
